The UNC Extension for Community Healthcare Outcomes for Rural Primary Care Medication Assisted Treatment (UNC ECHO for MAT) aims to reduce barriers to primary care providers offering medication assisted treatment to persons with opioid use disorders and reduce deaths from accidental overdose in NC.

Do you have questions about the ECHO for MAT project?

No matter where you are along the decision continuum, our experienced clinicians can speak with you about the project and your options for simply learning a little more about our ECHO project or how we can mentor you to become a buprenorphine provider and offering MAT in your practice.

Starting July 18th, we will be offering information sessions hosted by the UNC “Physician Hub team” members to discuss the ECHO for MAT project and what our multi-disciplinary team can offer.

Please call in to speak with one of our clinical leads by calling into one or more of the informational sessions below:

Mondays: Noon – 12:45 pm
Wednesdays: 5:45 pm – 6:30 pm
Thursdays: 7:15 am – 8:00 am

Call in number: 1-877-726-0176
Participant code: 52914038#

If you're looking for a mentor, we can help! Contact us to be connected with your individual physician mentor.

Contact us at echo@unc.edu or (919) 966-7104 for questions and to join our learning collaborative.

Principal Investigator, Dr. Sherri Green - sgreen@unc.edu
